

OL2 series recessed panel light

Overview

The OL2 Series Recessed Panel Light is an integrated fixture that easily replaces a conventional fluorescent fixture, delivering superior LED performance for improved light quality, uniformity and reduced glare.

By incorporating patented LED technology, the Recessed Panel Light achieves energy savings of 50-85 percent over conventional lighting sources.

The intelligent controller and options enable advanced energy management capabilities, providing additional savings.

The warranted 90,000-hour LED lumen life is superior to any other light available today. Imagine a light lasting for 20 years when used an average of 12 hours a day.

OL2 series recessed panel light - Key Features & Benefits

- Significant Energy Savings - Replaces up to 100 watt fixture with 45 watt or lower fixture
- Ideal as new or retrofit lighting for offices and other commercial applications
- Replaces yellow or dim lighting with more visible “white light” for improved light quality, uniformity and reduced glare
- Hermetically sealed for maintenance-free operation - prevents ingress of bugs, insects and dust
- About half the thickness of traditional fluorescent fixtures, minimizing the required install space
- Environmentally safe lighting
 - Zero mercury content
 - Eliminates disposal of hazardous material
 - Facilitates LEED points
- Options: Digital Dimmer, Motion Sensor, Occupancy Zone, Battery Backup
- Warranty: 10 years on LED elements, 5 years on materials and workmanship

Energy Saving Lighting = Carbon Reduction
